

## What are my math class choices?

### MAT 090: Intermediate Algebra

- Any student may take this course.
- This course is especially helpful for those students who do not feel confident in their algebra skills.
- This course *does not* count toward the General Education Mathematics requirement. This means that, after successfully completing MAT 090, you'll need to take MAT 110: College Algebra, MAT 130: Elementary Statistics, or higher mathematics course.

### MAT 110: College Algebra

- You may take this course if you have an ACT math score of 23 or higher, or SAT math score of 550 or higher.
- If you would like to take this course, but do not have the scores mentioned above, you may take a 30-minute test to determine your readiness for the course. If you get at least a 50% on the test, you may take the course.
- This course counts toward the General Education Mathematics requirement.

### MAT 120: Precalculus

- Same as above for College Algebra.
- This course would be beneficial to any student who wishes to take higher math courses (Calculus I – III, Differential Equations, Linear Algebra, etc.)

### MAT 210: Calculus I

- You may take this course if you have an ACT math score of 27 or higher, SAT math score of 630 or higher, or will be transferring credit for precalculus or equivalent course from a regionally-accredited institution.
- If you would like to take this course, but do not have the scores mentioned above, you may take a 30-minute test to determine your readiness for the course. If you get at least a 50% on the test, you may take the course.
- This course counts toward the General Education Mathematics requirement.
