*For the purposes of this exercise, I have assumed the student fulfills a minor of 18 credits (the average among minors offered at Cottey).

**Students pursuing a second major will need to work with an academic advisor to plan a specific degree path. Note that the sample path allots for time in the student schedule to complete a 30 credit hour second major, meaning that a student pursuing a second major would need to carefully plan their degree path with an academic advisor.

***I have been informed by the English Department that one upper-division, WGS cross-listed course will be taught in the even fall. It is unknown what specifically it will be due to Dr. Pivak's impending retirement.
